Profile Summary

MERN Stack Developer with nearly **4 years of experience** building scalable, secure, and high-performance web applications using **React.js, Next.js, Node.js, Express.js, NestJS, MongoDB, PostgreSQL, GraphQL, Redis, and TypeScript**.

Experienced in **REST API development, GraphQL services, backend architecture, database design, authentication, authorization, performance optimization, dashboard development, and scalable application development**.

Hands-on experience building **AI-powered recruitment platforms**, including job description matching, resume parsing, candidate profile extraction, AI-based candidate ranking, automated voice screening, candidate evaluation workflows, and recruitment analytics.

Strong understanding of **full-stack development, reusable component architecture, API integration, caching, query optimization, Agile/Scrum delivery, production debugging, and cross-functional collaboration**.

Skills

Languages: JavaScript ES6+, TypeScript, HTML5, CSS3

Frontend Development: React.js, Next.js, Redux, TanStack Query, React Hooks, Tailwind CSS, Material UI, Ant Design, ShadCN, Responsive Web Design

Backend Development: Node.js, Express.js, Nest.js, REST APIs, GraphQL APIs, Middleware, JWT Authentication, Microservices

Database: MongoDB, Mongoose, PostgreSQL, Redis, Indexing, Query Optimization, Prisma ORM

AI Tools & LLM Integration: GitHub Copilot, Cursor AI, ChatGPT, OpenAI API, LLM Integration, Prompt Engineering

Testing & Quality: Jest, React Testing Library

Tools & Platforms: Git, GitHub, Postman, Jira, Vercel, Netlify, AWS S3, CI/CD, Agile/Scrum

Work Experience

MERN Stack Developer

08/2025 – Present | Pune

Successive Technologies

Project: AI Talent Acquisition | Team Size: 10

Tech Stack: React.js, Tailwind CSS, Node.js, Express.js, MongoDB, TanStack Query, Redis, OpenAI API, LLM integration, ShadCn, RabbitMQ

- Built a **full-stack AI-powered recruitment platform** supporting **job management, candidate tracking, interview scheduling and analytics**
- **Collaborated** with **developers** through **pull request reviews, knowledge sharing, and technical discussions** to improve overall code quality
- Integrated **LLM/OpenAI API** for **resume parsing, job description parsing, candidate profile extraction, and structured data extraction** from unstructured documents.
- Built **candidate-to-job matching and AI-based ranking workflows** using extracted skills, experience, education, job requirements, and hiring criteria.
- Used **prompt engineering** to generate consistent structured JSON output for storage, validation, matching, and candidate screening workflows.
- Designed **reusable frontend component architecture** and **custom hooks improving maintainability and scalability**
- Used **RabbitMQ and Redis** for asynchronous background processing, upload handling, parsing tasks, caching, and faster recruitment workflow execution.
- Worked in **Agile/Scrum** environment collaborating with cross-functional teams to deliver scalable solutions.

Project: Audience Builder, Client: Dentsu, Team Size: 20

Tech Stack: React.js, Node.js, Express.js, Nest.js, GraphQL, MongoDB, Jest, Redis

- Developed scalable **GraphQL services** and **backend integrations** supporting audience activation workflows.

- Built **multi-audience publishing architecture** enabling simultaneous campaign deployment across **Amazon, Facebook** and **Instagram**.
- **Integrated Merkury** identity and **audience services** for advanced customer segmentation workflows.
- **Optimized API performance** and data retrieval using **caching** and query optimization techniques.
- Resolved **critical production issues** and improved application stability through structured debugging and monitoring practices.
- Utilized **GitHub Copilot** to accelerate **feature implementation** and reduce development turnaround time.

MERN Stack Developer

08/2024 – 07/2025 | Pune

Shaleemar IT Solutions

Project: Digital Lost & Found System | Team Size: 6

Tech Stack: React.js, Tailwind CSS, Ant Design, Node.js, Express.js, PostgreSQL,

- **Led** development of a **high-availability** system with **scalable architecture** for large-scale public event management
- Architected a **real-time data processing system using Node.js, PostgreSQL, and Redis**, enabling high-speed data retrieval during large-scale public events
- Implemented **AI-based identification workflows and optimized search indexing**, reducing record retrieval time by **40%**
- Designed **centralized dashboards with real-time synchronization using WebSockets**, improving coordination across operational teams
- Automated reporting workflows via backend services, reducing manual effort by **70%** and improving operational efficiency

MERN Stack Developer

02/2023 – 08/2024 | Pune

Metamind System

Project: File Management System | Team Size: 6

Tech Stack: React.js, Tailwind CSS, Ant Design, Node.js, Express.js, MongoDB, Tanstack Query

- Built **role-based** dashboards and workflow automation systems using **React.js, Node.js**, and **Tailwind CSS**, improving task processing efficiency
- Implemented **GraphQL APIs and multi-stage validation pipelines**, achieving **99% data accuracy** and ensuring reliable data processing workflows
- Designed **JWT-based** authentication and **RBAC authorization**, reducing unauthorized access and strengthening platform security
- Developed **multi-step workflows for file processing, validation, and management**, improving system efficiency and user productivity

Project: Company Website Redesign | Team Size: 6

Tech Stack: React.js, Next.js, Tailwind CSS, Node.js, Express.js, MongoDB, Tanstack Query, ShadCn

- Led **redesign and redevelopment of corporate website using React.js and Next.js**, improving performance and modernizing UI/UX
- Optimized application using **lazy loading, caching, and efficient asset management**, improving page load time by **40%**
- Enhanced **SEO, responsiveness, and cross-device compatibility**, increasing user engagement by **90%**
- Improved overall user experience through **optimized rendering and component structure**

Education

Bachelor of Engineering

07/2017 – 07/2021 | Pune, India

Marathwada Mitra Mandal Institute of Technology, Pune

CGPA: 7.81

Certification

Masai School

02/2021 – 01/2022 | Pune, India

Full Stack Web Development program covering essential technologies and best practices
